PRODUCT COLORS

Powder Coating

ELEKTROSTATIC POWDER PAINT

Types of Electrostatic Powder Coatings Based on Appearance

1 - Opaque (Solid Colour) Powder Coatings

Features: Completely covers the substrate.

Advantage: Ensures colour homogeneity.

Applications: All types of indoor and outdoor metal surfaces.

2- Matt Powder Coatings

Features: Low gloss level (approximately 5–30%).

Advantage: Conceals fingerprints and minor surface imperfections.

Applications: Office furniture, industrial machinery, interior metal surfaces.

3- Semi-Matte (Satin) Powder Coatings

Features: Gloss level is between 30–60%.

Advantage: Provides a balanced appearance; both decorative and durable.

Applications: White goods, interior decorative metals.

4- Glossy Powder Coatings

Properties: Gloss level is 70% and above.

Advantage: Provides vivid colours and a smooth surface effect.

Areas of Use: Automotive parts, aluminium profiles, decorative products.

5- Metallic Powder Coatings

Properties: Contains metallic pigments (e.g. aluminium, bronze).

Advantage: Provides a bright, sparkling and aesthetic appearance.

Areas of Use: Automotive rims, decorative accessories, advertising boards.

6- Textured Powder Coatings

Subtypes:

Hammer Textured: Creates a hammered surface effect.

Wrinkle: Provides a wrinkled surface effect.

Sandy: Provides a slightly grainy, matte surface.

Advantage: Conceals surface imperfections and is more scratch-resistant.

Applications: Industrial equipment, furniture legs, outdoor metal structures.

7- Transparent Powder Coatings

Features: Allows the underlying surface or base colour layer to show through.

Advantage: Provides depth and a special effect appearance.

Applications: Decorative parts, metal accessories, special designs.
